

Year 5 Homework Grid – To Infinity and Beyond

Expressive Arts Design and create a model, drawing, painting, or digital image of a spacecraft, planet, or space station. 	**Maths and Numeracy** Research the distances between planets in our Solar System and present the information using a table, chart, or scale drawing. 	**Language, Literacy and Communication** .Imagine you are an astronaut on a mission to another planet and write a recount describing what you see, hear, and feel during your adventure.  
Health and Wellbeing Imagine you are preparing for a journey into space and create a weekly plan showing how you would stay healthy, active, and positive during your mission. 	**Science and Technology** Create a fact file about one planet, explaining its size, temperature, atmosphere, and any interesting features. 	**Humanities** Research a famous space explorer, astronaut, or scientist and explain how they helped us learn more about space.   

Extra challenges:

- Design your own planet and describe its environment, wildlife, and inhabitants.
- Create a poster showing the order of the planets in our Solar System.
- Build a model of the Solar System using recycled materials.
- Write a poem inspired by the Moon, stars, or space travel.
- Research a space mission and present five fascinating facts.
- Create a constellation picture and invent a story to explain how it appeared in the sky.
- Design a space suit for exploring a newly discovered planet.
